Aram Fardad Parsian (AFPOIL) is a leading Iranian oilfield services company founded in 2017, delivering specialized well services across southern Iran's most strategic oilfields. With core expertise in cementing, acidizing, coiled tubing, and fluid injection, AFPOIL has completed over 400 operations for major national oil companies. Backed by ISO and HSE certifications and a high-capacity fleet, the company consistently delivers engineered, reliable, and optimized well services for complex upstream challenges.

## Achieved Certifications

## Standard

Integrated Management System

IMS

Quality Management System

ISO 9001

Occupational Health and Safety Management System

ISO 45001

Environmental Management System

ISO 14001

Occupational Health and Safety

ISO HSE-MS

## Core Values

**Safety:** Prioritizing the health and safety of our employees and stakeholders.

**Integrity:** Upholding the highest standards of honesty and ethical conduct.

**Commitment:** Dedicated to meeting and exceeding client expectations.

**Excellence:** Striving for superior performance in every project.

**Innovation:** Embracing new technologies and methodologies.

*We deliver high-impact well services that combine engineered design, field-proven tools, and real-time operational control — built for complexity, optimized for performance. Whether in mature assets or high-pressure reservoirs, our solutions are tailored to maximize flow efficiency, maintain integrity, and support sustainable production.*

## **Cementing**

We provide primary and remedial cementing services for zonal isolation, casing support, and long-term well integrity. Our blends, additives, and placement techniques are engineered for each formation — ensuring stable, safe, and reliable barriers from surface to reservoir.

## **Acidizing**

From matrix stimulation to wellbore cleanup, our acidizing solutions are designed to dissolve formation damage, improve near-wellbore permeability, and restore flow potential. We customize acid systems based on mineralogy, temperature, and operational objectives.

## **Coiled Tubing**

Our coiled tubing services offer a flexible platform for a wide range of interventions — including fluid circulation, scale removal, mechanical operations, and stimulation support. With fast mobilization and minimal surface footprint, we improve access and reduce downtime.

## **Fluid Injection**

We deliver precision-controlled fluid injection for pressure maintenance, chemical placement, and displacement operations. Our injection fleet is calibrated for consistency, with advanced monitoring and safety control systems in place.

## **Hydraulic Fracturing (Now Available)**

We are expanding into advanced stimulation with engineered frac solutions designed for reservoir-specific response. Our hydraulic fracturing services focus on pressure control, fracture geometry optimization, and fluid efficiency — executed under strict surface and subsurface controls.

*Every journey has turning points. For us, progress hasn't come in leaps — it has come in deliberate steps, hard-won breakthroughs, and the quiet discipline of showing up and delivering, again and again.*

### **2017 — Founded with a Clear Vision**

AFPOIL was established with a focused mission: to provide high-integrity well services tailored to the complex operational needs of Iran's southern oilfields. From day one, our commitment to technical rigor, safety, and local responsiveness set us apart.

### **2017–2019 — First Operations, First Successes**

We began with acidizing and cementing services across select onshore projects. Early field performance, attention to detail, and client responsiveness quickly earned us repeat operations and word-of-mouth growth.

### **2020 — Expansion of Service Lines**

By 2020, we had scaled our capabilities to include coiled tubing, fluid injection, and wellhead support. The investment in fleet, manpower, and technical infrastructure positioned us for multi-disciplinary service delivery.

### **2021 — Major Contracts Across Southern Fields**

With successful operations in Gachsaran, Bibi Hakimeh, Marun, and Aghajari, we secured long-term contracts covering over 400 field operations. This year marked our transition from a niche service provider to a trusted operational partner.

### **2022 — Operational Integration & Fleet Growth**

To ensure consistent service quality at scale, we integrated our quality, HSE, and logistics systems into a centralized operational framework. We also expanded our fleet with new frac pumps, nitrogen units, and high-capacity fluid handling assets.

### **2023 — Emergency Operations & Regional Responsiveness**

In response to natural flooding events in key oil-producing regions, AFPOIL deployed emergency pump support and pipeline stabilization teams. Our ability to respond under pressure solidified our reputation for reliability beyond routine operations.

### **2024 — Entering New Frontiers: Hydraulic Fracturing**

This year marked a new chapter as we launched our first hydraulic fracturing project, backed by modern pumping systems and engineered frac designs. It's a strategic move into advanced stimulation — and a sign of where we're headed.

### **2025 — Positioned for Regional Leadership**

With integrated service capabilities, a robust technical workforce, and an expanding operational footprint, AFPOIL is now positioned not just to serve — but to shape — the future of upstream well services in Iran and beyond.

Each milestone has prepared us for the next. We haven't grown by accident — we've grown by design, through consistent execution, smart reinvestment, and a deep respect for the field.

**And we're just getting started**
